As Is Process:

1. Blood test requested by Primary Treatment Centre (PTC)
2. Blood sample taken by Community Nurse or Paediatric Oncology Shared Care Unit (POSCU) and the specimen details are documented
3. Blood Laboratory Order is created and an laboratory order request is sent to the laboratory
4. Blood test performed by laboratory
5. Laboratory writes up blood results report (laboratory report)
6. Laboratory report sent to Community Nurse or POSCU
7. Laboratory report then sent to PTC
8. Community Nurse or POSCU calls PTC by phone to notify that the results have been sent and to confirm that they have been received
9. If results cannot be understood, PTC will call Community Nurse or POSCU to inform them. This is usually due to a defective message
10. Community Nurse or POSCU sends results in a different format (via telephone or re writes the results out)
11. PTC may edit child's prescription on regimen in light of blood results and may need to recall patient into hospital for additional tests
12. If prescription is amended then PTC must notify POSCU
